10 January 1956

**MEMORANDUM FOR THE RECORD:**

**SUBJECT: Titling of Original Film**

25X1

25X1

1. Discussions were held with [REDACTED] of Eastman at 1142 Q Building at 1900 on 9 January, regarding the titling of original negatives. [REDACTED] explained that the present concept was to provide all the information previously requested with each item being designated for ease of understanding. This would be accomplished by prefixing the altitude figures with Alt. 50,000, the tilt angle with Obl-37°, etc.

25X1

2. [REDACTED] stated that it would be desirable to have the variable items adjacent to each other and asked if there was any objection to transposing certain items to accomplish this objective. Such transposition is not objectionable since each item will be labeled.

25X1

3. The exact manner of titling has not been determined although various processes are under consideration. The present system will utilize numbers and letters spaced 14 to the inch with the entire title covering about 6 inches. [REDACTED] feels that the problem will be satisfactorily solved.
